SUMMARY

Computer Science student with experience in frontend development, real-time communication, and API integration, specializing in building extensible, user-friendly web applications. Proficient in React.js, Next.js, Node.js, and JavaScript, with expertise in problem-solving, data structures, and OOP in C++.

EDUCATION

B.Tech in Computer Science and Engineering, June 2026
Delhi Technical Campus, Greater Noida 9.30 CGPA
Relevant Coursework: Data Structures and Algorithms (C++), Operating Systems, Database Management Systems, Computer Networks, Object-Oriented Programming(C++), Compiler Design, Web Technologies, Machine Learning
Coursera Courses: [Developing Front-End Apps with React\(IBM\)](#), [Python for Data Science\(IBM\)](#), [AI & Development](#)

TECHNICAL SKILLS AND CERTIFICATIONS

Programming Languages: C/C++, JavaScript, Python, SQL
Front-End: HTML, CSS, React.js, Next.js, Bootstrap, Tailwind CSS, Redux-toolkit
Back-End: Node.js, Express.js, MongoDB, Socket.io
Version Control Tools: Git and GitHub

EXPERIENCE

Wasserstoff RJ Innovations Pvt Ltd, Onsite, Gurgaon: Frontend Developer Intern June 2025 – Present
Litlaw – AI-Enhanced Legal Document Automation Platform.

- Contributed to a collaborative rich-text editor using Tiptap, rendering Markdown-to-HTML content and integrating a real-time version comparison engine with Accept/Reject functionality for efficient legal document review and approval workflows.
- Engineered the **conversion system**, implementing **HTML-to-PDF (Puppeteer)** and **HTML-to-DOCX** exports to ensure precise formatting and compliance with legal standards.

CassprAir - AI-Powered Social Media GTM Engine.

- Led the design and implementation of the core AI Agent Workspace, leading the development and integration of specialized AI Image Generation (carousels, memes, etc.) and multi-platform AI Text Generation (Blogger, LinkedIn, Medium, Threads, X) capabilities.
- Directed the end-to-end development of the intuitive Content Calendar, enabling users to strategically plan, schedule, visualize, and manage their AI-powered social media content pipeline efficiently.

Mylamp.ai, Remote: Web Developer Intern  June 2024 – August 2024
Contributed to the frontend architecture, RESTful API development, and authentication system of the Wize.co.in platform, ensuring seamless feature integration and a smooth user experience.

- Developed and optimized **TypeScript-based RESTful APIs** and implemented a **NextAuth-powered authentication system**, enhancing login reliability and reducing access-related support requests.
- Architected and integrated real-time communication features using Socket.io, enabling efficient message handling and live interactions across user communities

PROJECTS

AI-Powered Next.js Code Generation Platform  Oct 2025

- Built an **AI-powered platform** that converts natural language prompts into **production-ready Next.js applications**, featuring real-time code preview, project management, and secure authentication with Clerk, Inngeist background jobs, and credit-based usage tracking.

Real-time collaborative Text Editor 

- Developed a fully-featured real-time collaborative text editor using Next.js 15, Tiptap Editor, Tailwind CSS, and Convex, enabling rich-text editing, commenting, and multi-user collaboration with live cursor tracking.
- Architected and implemented organization-based workspace features using Clerk Auth and Liveblocks, enabling users to create shared documents, invite team members with role-based permissions, and collaborate in real-time with live cursor tracking.
