PROFESSIONAL SUMMARY

Analyst with expertise in data visualization, business intelligence, and process improvement, blending technical skills with business acumen. Skilled in Power BI, Tableau, Excel, SQL, and data cleaning, with experience delivering dashboards and reports that support decision-making. Recognized for academic excellence (GPA 9.27) and leadership in technology communities. Seeking Analyst roles to leverage data-driven insights for operational efficiency and strategic growth.

EDUCATION

SRM University, Delhi NCR

2023-2026

Bachelor of Computer Applications (BCA) – Data Science | SRM University, Delhi NCR

GPA: 9.27 | Academic Excellence Award (Rank Holder)

Relevant Coursework: Data Analytics, Business Intelligence, SQL & Databases, Predictive Analytics

CORE SKILLS

- Data Analysis & Visualization – Power BI, Tableau, Excel, SQL
- Business Intelligence – KPI reporting, dashboard creation, stakeholder reporting
- Data Processing – Data cleaning, transformation, and automation
- Domain Knowledge – Business strategy, finance fundamentals, operations
- Soft Skills – Leadership, cross-functional collaboration, problem solving

PROJECTS

Customer Personality Analysis (Tableau)

- Segmented customers based on demographics, spending behavior, and engagement patterns.
- Provided insights for personalized marketing strategies and customer retention initiatives.

Data Professional Survey Analysis (Power BI)

- Explored career trends, job satisfaction, and salary distribution among data professionals.
- Identified top programming languages, industry trends, and diversity insights.

Bike Sales Data Analysis (Excel)

- Conducted demographic and financial analysis to determine key factors influencing bike purchases.
- Optimized sales strategies and marketing approaches based on data-driven insights.

Layoff Data Cleaning (MySQL)

- Cleaned and standardized layoff datasets to improve data accuracy and consistency.
- Removed duplicates, handled missing values, and corrected data inconsistencies.

EXPERIENCE

Cybersecurity & Data Analytics Intern – C-DOT (Centre for Development of Telematics) | May 2025 – Jun 2025

- Developed an API for secure data integration & security testing, reducing processing time by 20%.
- Built Fuzzino, a random data generation tool for stress-testing systems.
- Designed Power BI dashboards visualizing large-scale telecom datasets, enabling real-time network health monitoring.

Python Developer Intern – Upskill Campus |

Jul 2024 – Aug 2024

- Automated data processing workflows using Python & SQL, improving reporting speed by 15%.
- Collaborated with team members to optimize database structures for faster query execution.
- Delivered reporting solutions that enhanced project tracking and KPI monitoring.

CERTIFICATIONS

- PL-300 Microsoft Power BI Data Analyst – **Microsoft**
- Data Visualization & Business Intelligence – **Tata Forage**
- Data Analytics Job Simulation – **Deloitte**
- Getting Started with Data – **IBM**
- Project Management Fundamentals – **IBM**
- Corporate Finance Fundamentals – **CFI**

LEADERSHIP AND ACHIEVEMENTS

- Community Influencer – Microsoft Learn Student Ambassador Program – Led college engagement initiatives, increasing participation by 40%.
- Core Member – GeeksforGeeks College Chapter – Organized tech events, mentored students, and coordinated workshops with 100+ participants.
- Academic Excellence Award – Recognized as a top rank holder at SRM University.
